

## ShotSpotter supports proactive, precision-based, community-focused policing

## Real-time tactical intelligence works 24/7

## How the ShotSpotter Flex System works

**“What you get with ShotSpotter is real-time information** so the police can respond so much faster. It increases the chances of catching the shooter... recovering the weapons... stopping further crime... The audio sensors detect gunfire, pinpoint the shots... within feet of where they have occurred.”

Mayor Bill DeBlasio  
New York City, NY
